Aliaksandr Bosiakou

I am a student at BSU and a junior software developer.
Minsk, Belarus

Education

Belarusian State University
Bachelor's degree, Applied Mathematics
(September 2022 - July 2026)

Summary

I am currently focusing on a Java developer and am working on several educational projects C++.

While studying at BSU, I studied courses in Algorithms and data Structures, framework QT, operating systems and Industrial programming in Java.

Working with Java, I studied such features and tools as: Maven, JUnit, Json and so on.

In the operating systems course I studied the work of threads and processes; how to work with Win32API, CMake, Boost and Google Test.

In the program of my specialty there is an English language course, studying which I increased my level of understanding of the language and expanded my vocabulary.

Also during my summer practice worked with Git and study basics of .NET and C#.

I actively improve my skills, expand my knowledge in various areas of programming and more.
